## A TRANSFER STUDENT DEFINED

Determining if you are a transfer or first-year student can be confusing, especially if you've taken college-level coursework in high school. Essentially, there are two questions to ask:

Have you enrolled in a long semester of college (fall or spring) after graduating from high school?

After graduating from high school, have you taken a gap year and enrolled as a non-degree seeking student?

If your answer to either of these questions is yes, congratulations — you're a transfer student! Transfer students have already graduated from high school and have enrolled at an accredited college for at least one long semester (fall or spring). Enrolling in a college the summer after high school graduation does not count as a long semester and will not count toward transfer consideration.

Check out additional information about how to transfer as a transfer or second-degree student at belmont.edu/apply.

# Transfer Gredit

- Most college level courses with a grade of "C-" or better will transfer.
- All courses are individually assessed for application to the Belmont BELL core curriculum. Course equivalency is subject to change.
- Other classes may transfer or fulfill degree requirements.
- If you have taken AP, IB or CLEP tests, official score reports must be submitted to earn credit.

### CORE EQUIVALENCY GUIDE

If transferring from a community college, a maximum of 64 credits can be transferable. If you have questions about how your general education classes may transfer in, you can utilize Transferology at transferology.com/school/belmont.

### **DEGREE COGNATES**

These distinguish the various degrees from one another. You are only required to take the hours listed under the particular degree you are pursuing. There may be additional specific core classes needed based on the major. Students should choose Degree Cognates in different subjects than the Foundation Courses (2 different prefixes).
